

Local Authority Parking Finances in England

David Leibling
December 2015

1. Introduction

Each year local authorities are required to submit details of their finances to the Department of Communities and Local Government, following a detailed set of rules prepared by the Department. They are normally published in November after the financial year end¹. In addition under the Transparency Code 2015 councils in England are required to publish on their websites details of their parking income and expenditure on- and off-street and how the surpluses are used. They must also show the number of controlled on- and off- street parking spaces. Many councils are not yet following the Transparency Code and the data do not necessarily agree with the data supplied to DCLG in the standard format. See Appendix 1 for a summary of the different statutory and non-statutory reporting requirements.

This report uses the DCLG tables on parking income and expenditure for the period from 2010/11 to 2014/15 rather than the Transparency Code data, as all councils respond in a consistent format although there may be some differences in interpretation. Councils are also required to submit their budgets for the current financial year but on a less detailed basis. These figure are included where appropriate.

There are 353 local authorities in England. In addition there are 6 national parks which declare income from parking and show a total surplus of £1.4 million.

The income and cost² headings used in this analysis are:

1. On-street income, expenditure and income from penalty charges;
2. Off-street income, expenditure;
3. Total transport income, expenditure.

These headings do not always agree with accounts published by local authorities because of their different treatment of overheads and allocation of surpluses to other transport projects. Furthermore seven local authorities include off-street parking in their internal trading accounts which leads to further inconsistencies. These trading figures have been added to the revenue accounts. The DCLG dataset is the only available national and comparable source of parking revenue information.

2. Summary

Table 1 below shows the summary accounts for local authorities in England. Overall in 2014/15 they collected just over £1.4 billion from parking tickets, permits and penalties, spent just under £0.8 billion and made a surplus of nearly £0.7 billion, which contributes about 15% of the total cost of local authority transport expenditure.

¹ <https://www.gov.uk/government/statistics/local-authority-revenue-expenditure-and-financing-in-england-2014-to-2015-final-outturn>

² The costs referred to throughout this report are revenue expenditure.

On-street income rose by only 3% over 2013/14. On-street penalty income fell by 4%. Penalty charge notices issued in London in 2014/15 were 3.82 million, 6% lower than in 2013/14; figures for the rest of England are not yet available but it would appear that the level of penalties has levelled off. Off street income was unchanged from last year.

However, local authorities have maintained their running costs overall with a 3% increase in on-street costs offset by 4% fall in off-street costs.

As a result the surplus from on-street parking rose by 3% and by 5% from off-street, leading to an overall increase of 4% to £693 million from £667 million in 2013/14. Local authorities in England are budgeting for a surplus in the current year of £687 million.

This on-street surplus must by law be used for transport and environmental projects. The total surplus contributed 15% of all local transport expenditure.

3. Income

Total income in 2014/15 was £1.45 billion, (2% higher than in 2012/13). Income from on-street tickets and permits was £0.5 billion (up 9%) and a further £0.3 billion comes from on-street penalty charges (down 4% for the second year) and £0.65 billion (up 3%) from off-street charges and penalties. Note that this does not include off-street income received by commercial off-street parking facilities. The total parking income is equivalent to about £50 per year per motorist – a similar figure to that derived from the annual Living Costs survey and much lower than the average motorist spends a year on fuel, yet parking charges are a very emotive topic amongst motorists.

40% of total parking income comes from London although Londoners own only 10% of the cars in the UK but of course incoming commuters and other drivers will also contribute to parking income and penalties. London boroughs make relatively little from

off-street parking (about 10% of total income compared with 68% for English councils outside London) as most of London's off street car parks are commercially run.

	Total London	519.3	552.2	557.4	565.1	581.9	3%

*Haringey figure seems anomalous and differs from the published annual parking report.

Overall on- and off-street parking income in London in 2014/15 is 3% higher than in 2013/14 but this ranges from an increase of over 15% in Barnet, Havering and Brent to declines of over 15% in Hillingdon, Southwark and Sutton.

Over a five year period, parking income in London has risen by over 40% in Ealing, Greenwich, Merton, Havering and Barnet and fallen by over 20% in Hillingdon and Southwark.

	Total excluding London	803.8	820	847.9	860.4	868.2	1%

Overall, parking income in England outside London has risen by 1% since 2013/14. The highest income outside London is in Brighton and Hove which would rank 7th nationally after the top six London boroughs. Nottingham ranks 2nd outside London because it collects around £11 million per year from the Workplace Parking Levy which is now in its third year. This is dedicated to transport improvements in the Nottingham area, mainly for extension to the tram system.

In contrast to on-street parking which is dominated by the London boroughs, off-street parking is much more important in large towns. Overall off-street income was static, so any efforts by councils trying to reduce parking charges in high streets to encourage trade have been offset by higher charge elsewhere. Excluding Nottingham with its Workplace Parking Levy, Cornwall tops the list because as a unitary authority it manages parking for the whole of the county. Chelmsford showed a large increase in off-street income in 2014-15. Five London boroughs do not have any council off-street parking as it is now all commercially operated (Hackney, Hammersmith and Fulham, Islington, Wandsworth, Westminster), while Lambeth and Tower Hamlets show only nominal amounts.

Tables 4a and 4b below show penalty income for on-street parking and show the proportion of total on-street income that it represents. Overall penalty income in 2014/15 was £329 million compared with £343 million in 2013-14, a fall of 4%. The number of penalty charge notices issued in London in 2014/15 was 3.82 million, 6% lower than in 2013/14 mainly because of a 33% drop in Westminster; figures for the rest of England are not yet available but it would appear that the level of penalties has levelled off.

Total penalty income in London in 2014/15 was £235 million – 71% of the national total of £329 million. The non-London amount remained unchanged at £94 million. The highest non-London council, Manchester, ranked 19th nationally. London councils decreased their penalty income in 2104/15 by 3%. Lambeth now tops the table in London with penalty income of £18.3 million while Westminster has fallen from

£25.1 million to £17.1 million because of the 33% drop in PCNs. Haringey declared £18.0 million, more than double the previous year but this is not consistent with the number of penalty notices issued which only went up by 6%. Sutton does not record any penalty income at all. While some of the change may reflect changes in enforcement as reflected in the number of PCNs issued, the magnitude suggests that there are inconsistencies in reporting.

Outside London, the picture is more varied and also reflects two-tier management of parking, where in some cases, e.g. Essex, the county collects the penalty income while the districts collect the meter income. Overall outside London penalty income fell from £101 million to £94 million. This may reflect both enforcement policy (e.g. fewer enforcement officers on the streets, leniency towards minor infringements) and driver behaviour (better compliance). However, several councils with large penalty income in 2013-14 did not declare any in 2014-15 e.g. Bristol £5.0 million, Leeds £3.2 million, Milton Keynes £2.1 million and Dacorum £2.1 million. Bristol for example has not yet published its 2014/15 parking accounts to compare with its DCLG returns.

On-street penalties typically represent between 25% and 90% of total on-street income, with non-London councils towards the lower end, suggesting a lower level of enforcement. At the lower end in London are Wandsworth, Kensington and Chelsea and Westminster. In the last two cases, the high proportion of non-permit income reflects the high hourly parking charges and the high cost of the large number of residents' permits. Barking & Dagenham, Harrow Lewisham and Newham show penalty income near or at 100% of on-street income which suggests high levels of enforcement or more likely, inconsistencies in reporting.

Penalty income can also be compared with the number of PCNs issued. The comparison is not exact, as penalty income is only recorded for on-street offences (which are the majority of offences) while the number of PCNs is for all offences.

The average income per PCN in London has fallen to £62 from £67 in 2013/14. Outside London the average is much lower – a fairly constant £24 per PCN (2013/14 data). Councils outside London are trying to have penalty levels raised as they are sometimes less than the cost of a day's parking.

Figure 2 Penalty Charge Notices issued and income

4. Costs

Tables 5a and 5b below show expenditure on parking both on- and off- street. Costs have risen in London to £274 million from £269 million in 2013/14 but most of this is due to a big increase in Barnet after an abnormally low figure in 2013/14. Correcting for this, costs have fallen by £5 million (2%). In the rest of England costs fell from £489 million to £482 million with any reduction due to efficiency being offset by councils extending their parking controls.

The tables also show the proportion of income taken up by costs. Councils vary considerably in how much of their parking income is absorbed by costs which may be partly to do with accounting treatment, for example the way overheads are allocated. Costs also vary between years – Westminster has reduced its costs by 6% over the past year but its income fell by 8% so costs now represent 38% of total income. Hillingdon has reduced its costs by 34%. In Barnet, Havering and Southwark costs exceed 80% of income. Brent increased its costs by 35% but they are still half of the costs in 2011/12. Havering and Redbridge have increased their costs by over 20%.

5. Surpluses

Table 6a and 6b show the surpluses for on- and off- street parking and the changes over the past year. London councils made a combined surplus of £307 million in 2014/15, 4% higher than in 2013/14 but this includes the apparently anomalous surplus in Haringey. If this, and Barnet's figure for 2013/14 are adjusted, then the parking surpluses in London were 3% higher. In the rest of England, councils made a surplus of £386 million, an increase of 4%.

Every council in London made a surplus in 2014/15. Westminster saw its surplus decrease by 9% to £46.4 million due to a drop of £7.6 million in its penalty income (before enforcement costs) but it had anticipated it in its forecasting as the surplus was very close to its 2014/15 budgeted figure. The top five London councils (Westminster, Kensington & Chelsea, Camden, Hammersmith & Fulham and Wandsworth) account for almost half the total surpluses for London. Barnet and Southwark showed large falls but this is against exceptionally high figures for 2013/14; the results for 2014/15 were in line with earlier

years. Four London councils saw reductions of over 10% in 2014/15 compared with 2013/14 and a further six saw reductions of under 10%. Twelve saw increases of over 10% plus Haringey with its apparently anomalous increase of 96%. Haringey's budgeted figure for 2014/15 was only £8.9 million compared with £16.1 million actual but the budget figure for 2015/16 is closer to the historic trend (see Appendix 2). Hackney has budgeted £3.7 million, well below its historic figures but the actual for 2014/15 was £10.8 million, 21% above the previous year.

Outside London, Brighton & Hove made the largest surplus and had the sixth largest surplus nationally followed by Nottingham which now has a very large contribution from the workplace parking levy. The top 20 councils increased their surpluses by 7% compared with the national average outside London of 4%. Manchester has trebled its surplus over the past five years while Bristol and Birmingham have doubled their surpluses. Only Bristol and Milton Keynes of the top 20 showed declines in 2014/15 compared with 2013/14.

Note: some percentages might be slightly out due to rounding

DCLG also publishes councils' budget figures for the current year but only shows net surplus. Table 7 shows the biggest changes both positive and negative.

Westminster is budgeting to return to its historic levels in 2015/16 after a (planned) big drop in 2014/15 and a number of other London boroughs are planning large increases. Three London boroughs (Haringey, Hackney and Lambeth) are planning large decreases; as noted above Haringey's 2014/15 large surplus seems anomalous.

Appendix 3 lists local authority parking operations revenue outturn for England in alphabetical order and by order of 2014/15 surplus.

Table 7 Largest differences between parking surplus in 2015/16 budget and 2014/15 actual

£ million	2015-16 budget	2014-15 actual	Difference

Appendix 1

Requirements for publishing data on Parking

DCLG Transparency code

<https://www.gov.uk/government/publications/local-government-transparency-code-2015>

Parking account

46. Local authorities must publish on their website, or place a link on their website to this data if published elsewhere:

- a breakdown of income and expenditure on the authority's parking account
- The breakdown of income must include details of revenue collected from on-street parking, off-street parking and Penalty Charge Notices, and
- a breakdown of how the authority has spent a surplus on its parking account.

Parking spaces

47. Local authorities must publish the number of marked out controlled on and off-street parking spaces within their area, or an estimate of the number of spaces where controlled parking space is not marked out in individual parking bays or spaces.

DCLG Forms for general fund revenue account outturn

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/439842/RO_2014-15_Forms_V2.xlsx

For On- and Off-street parking:

- Employees. Running Expenses, Total Expenditure,
- Sales, Fees, & Charges, Other Income, Total Income,
- Net Current Expenditure

For on-street parking

- On-street parking: Penalty Charge Notice income included in income line
- On street parking: other sales, fees and charges in income line

DFT Statutory Guidelines on Civil Enforcement of Parking

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/421131/financial-statutory-guidance.pdf

What enforcement authority annual reports should include

Financial

- Total income and expenditure on the parking account kept under section 55 of the Road Traffic Regulation Act 1984 as modified by regulation 25 of the Civil Enforcement of Parking Contraventions (England) General Regulations 2007 (see paragraph 12.12 above).
- Breakdown of income by source (i.e. on-street parking charges and penalty charges)
- Total surplus or deficit on the parking account

- Action taken with respect to a surplus or deficit on the parking account
- Details of how any financial surplus has been or is to be spent, including the benefits that can be expected as a result of such expenditure.

Statistical

- Number of higher level penalty charge notices issued
- Number of lower level penalty charge notices issued
- Number of penalty charge notices paid
- Number of penalty charge notices paid at discount rate
- Number of penalty charge notices against which an informal or formal representation was made
- Number of penalty charge notices cancelled as a result of an informal or a formal representation is successful)
- Number of penalty charge notices written off for other reasons (e.g. an error by the civil enforcement officer or driver untraceable)
- Number of vehicles immobilised
- Number of vehicles removed

Performance against targets

- Performance against any parking or civil parking enforcement targets. Authorities should note the recommendations throughout this Guidance on the areas where such targets might be appropriate.

DFT Operational Guidance:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/212559/parking-enforcement-policy.pdf

The enforcement authority keeps any proceeds from penalty charges, which finance the enforcement and adjudication systems. Authorities must only use any financial surpluses from on-street parking charges and on- and off-street penalty charges for the purposes set out in section 55 (as amended) of the RTRA and authorities need to keep separate accounts of PCN income from on-street enforcement and from off-street enforcement.

Appendix 2

Haringey income and expenditure
