

June 2019 – English councils parking operations budget forecasts 2019-20  
 Alphabetical and ranked by 2019-20 budget estimate

**Note:**

These figures do not take into account any capital charges - either for capital expenditure on new car parks or interest and depreciation on existing car parks – that local authorities might incur as these are not included in the MHCLG tables. Also excluded is any allocation of corporate overheads.

There are some minor adjustments to some figures from previous years to include trading surpluses for those councils who treat off-street parking as a trading activity. These total around £4m overall.

In the case of Nottingham City Council revenue from the Work Place parking Levy has been excluded.

Also, figures for the National Parks are excluded even though they are in the MHCLG source tables.

Over time some local authorities merge their parking operations. Where we have noticed this take place historic data for individual councils has been added together. An example is Bournemouth, Christchurch and Poole which now reports a single combined figure.

Some councils routinely report nil values. This is likely to be where parking in that area is managed by another authority.
